

The 3020 Compressor is a useful option for low-flow sampling of wells at depths to 200 feet. It runs on a 12 volt DC electrical supply, and can be connected to your vehicle's battery with the supplied cables, or driven by a separate power source. At just 15x11x6-1/2" and 15 pounds, it offers an extremely convenient, portable pneumatic power choice for many sampling systems.

Key Specifications

- Oil-free, direct drive operation.
- Rugged aluminum case

Benefits

- Low maintenance, reliable operation
